

Pramit Roy

QA/SDET Co-op Candidate | Testing, Debugging, Python, JavaScript, SQL, Git | 5+ Years IT Systems Experience

Toronto, ON royp15@mcmaster.ca linkedin.com/in/pramit-roy-338729289 github.com/proyneon-hub pramitroy.tech

SUMMARY

QA Automation / SDET co-op candidate with software project experience and a strong IT systems background. Experienced in issue isolation, root-cause troubleshooting, deployment validation, documentation, process adherence, and device testing. Seeking Fall 2026 QA, SDET, test automation, software analyst, or systems QA co-op roles.

Target roles: QA Automation Co-op, Software Developer in Test Co-op, Test Automation Co-op, Software Analyst Intern, Systems QA Intern.

TECHNICAL SKILLS

Priority: Testing, QA Automation, Issue Isolation, Root-Cause Troubleshooting, Deployment Validation, Python, JavaScript, TypeScript, SQL, Git, REST APIs, Documentation

Software: React, Next.js, Node.js, Express, MongoDB, HTML/CSS, responsive UI

Quality Practices: Reproduction steps, validation checks, regression thinking, process adherence, defect documentation

Systems: Device testing, troubleshooting, technical documentation, network fundamentals

PROJECTS

IT Ticketing System

React, Node.js, Express, MongoDB

Live: it-ticketing-system-pi.vercel.app | GitHub: github.com/proyneon-hub/it-ticketing-system

- Built a full-stack ticket workflow with create, filter, update, assign, delete, and persistence behavior.
- Designed flows that support test scenarios around ticket status transitions, form validation, API behavior, and filtering.
- Used service-management context to think through real user workflows, edge cases, and reproducible issue reports.

Chess Game

Next.js, TypeScript, Tailwind CSS

Live: test-chess-game-roy-kappa-five.vercel.app | GitHub: github.com/proyneon-hub/Chess-Game

- Developed an interactive browser-based application with frontend state management and game logic.
- Created a useful QA surface for validating UI state, user input sequences, rule behavior, and component interactions.

Enterprise Network Design

Cisco Packet Tracer, VLANs, OSPF, ACLs

GitHub: github.com/proyneon-hub/enterprise-network-design

- Configured a secure multi-site network and validated connectivity, segmentation, and blocked traffic paths.

IT SYSTEMS EXPERIENCE

IT Systems Experience

5+ years

- Isolated issues by gathering symptoms, reproducing failures, testing assumptions, and documenting resolution steps.
- Performed deployment and device validation checks to confirm expected behavior after changes.
- Followed support processes while communicating status, blockers, and root-cause findings clearly.
- Created technical notes and documentation that made recurring issues easier to diagnose and prevent.

EDUCATION

McMaster University

Fall 2026 Co-op Candidate
