

Pramit Roy

Software Engineering Co-op Student | JavaScript/TypeScript, Python, SQL, Git | 5+ Years IT Systems Experience

Toronto, ON royp15@mcmaster.ca linkedin.com/in/pramit-roy-338729289 github.com/proyneon-hub pramitroy.tech

SUMMARY

Software Engineering student seeking Fall 2026 software developer co-op roles. Combines full-stack project experience with 5+ years of IT systems work, bringing strong habits in debugging, production support, deployment validation, technical documentation, and systems reliability.

Target roles: Software Developer Co-op, Software Engineering Intern, Full-Stack Developer Co-op, Web Developer Co-op.

TECHNICAL SKILLS

Priority: JavaScript, TypeScript, Python, Java, SQL, Git, REST APIs, HTML/CSS, Testing, Debugging

Frontend: React, Next.js, Vite, responsive UI, accessibility, Tailwind CSS

Backend & Data: Node.js, Express, MongoDB, SQL, API design, data modeling

Workflow: GitHub, code review, documentation, deployment validation, troubleshooting

PROJECTS

IT Ticketing System

React, Node.js, Express, MongoDB

Live: it-ticketing-system-pi.vercel.app | GitHub: github.com/proyneon-hub/it-ticketing-system

- Built a full-stack support ticketing app for creating, filtering, updating, assigning, and deleting IT tickets.
- Implemented ticket lifecycle logic that mirrors real IT service workflows and persistent MongoDB storage.
- Designed a practical React interface with clear status visibility, reusable components, and REST API integration.

Chess Game

Next.js, TypeScript, Tailwind CSS

Live: test-chess-game-roy-kappa-five.vercel.app | GitHub: github.com/proyneon-hub/Chess-Game

- Developed an interactive chess app using TypeScript, component-based UI design, and frontend state management.
- Focused on predictable state handling, reusable UI components, and a maintainable frontend structure.

Personal Portfolio

HTML, CSS, JavaScript

Live: pramitroy.tech | GitHub: github.com/proyneon-hub/personal-portfolio

- Built a lightweight, accessible portfolio with semantic HTML, modern CSS, modular JavaScript, and SEO metadata.

IT SYSTEMS EXPERIENCE

IT Systems Experience

5+ years

- Debugged user-facing technical issues across systems, devices, and support workflows.
- Supported production-like environments by validating changes, documenting fixes, and escalating clearly when needed.
- Created technical documentation that improved repeatability for troubleshooting and deployment validation.
- Built a systems reliability mindset through practical support, process adherence, and issue follow-through.
