

Pramit Roy

DevOps / IT Automation / Systems Analyst Candidate | Full-Time & Co-op | Git, Python, Linux, Deployment Validation, Networking

Toronto, ON royp15@mcmaster.ca linkedin.com/in/pramit-roy-338729289 github.com/proyneon-hub pramitroy.vercel.app

SUMMARY

DevOps / IT Automation and systems-focused candidate with software engineering coursework, full-stack projects, and 5+ years of IT systems experience. Brings practical strengths in troubleshooting, deployment validation, technical documentation, production support, network fundamentals, and systems reliability. Open to full-time and co-op roles in DevOps / IT Automation, systems analysis, technical analysis, or cloud-adjacent operations.

TECHNICAL SKILLS

- Systems & Automation:** Linux, Bash/Shell Scripting, CLI, Git, GitHub, Deployment Validation
- DevOps Tooling:** GitHub Actions, Docker, GHCR, Prometheus, Grafana, CodeQL, Runbook Documentation, Release Validation
- Networking:** VLANs, OSPF, ACLs, Cisco Packet Tracer, Network Diagnostics
- Programming/Scripting:** Python, JavaScript, SQL
- Web/Backend:** Node.js, Express, REST APIs, MongoDB
- Operations:** Incident Troubleshooting, Production Support, Escalation, Technical Documentation

PROJECTS

- Enterprise Network Design**
GitHub: github.com/proyneon-hub/enterprise-network-design
 - Designed and configured a secure multi-site enterprise network with VLAN segmentation and 802.1Q trunking.
 - Implemented OSPF routing and extended ACLs to separate Admin, IT, Guest, and Branch network traffic.
 - Validated expected connectivity and blocked traffic paths through Cisco IOS checks and documented network behavior.

Cisco Packet Tracer, VLANs, OSPF, ACLs
- IT Ticketing System**
Live: it-ticketing-system-pi.vercel.app | GitHub: github.com/proyneon-hub/it-ticketing-system
 - Built a role-based service desk with a staged GitHub Actions pipeline (lint, unit, integration, browser and real-stack smoke tests, Docker image to GHCR, then an approval-gated smoke test of the deployed site) plus CodeQL and Dependabot.
 - Added request IDs that trace a user-facing error to a log line, Prometheus metrics with a provisioned Grafana dashboard, health and readiness probes, and a runbook.
 - Wrote Python tooling that checks the live site hourly and opens an incident issue on failure, closing it on recovery; logged 22 defects, three found only on the deployed site.

Docker, GitHub Actions, Prometheus, Python, MongoDB
- Personal Portfolio**
Live: pramitroy.vercel.app | GitHub: github.com/proyneon-hub/personal-portfolio
 - Built a lightweight static site optimized for accessibility, performance, and SEO, deployed on Vercel from GitHub with security headers and cache rules.

HTML, CSS, JavaScript

PROFESSIONAL EXPERIENCE

- IT Technician, Blum Technology, formerly CDI Technologies - Markham, ON**
May 2019 - Nov 2023
 - Performed high-volume endpoint imaging, cloning, configuration, testing, repair, and secure data wiping workflows.
 - Prepared approximately 200 devices per week and supported thousands of deployment-ready device workflows over 4+ years.
 - Resolved hardware, software, operating system, and network issues through on-site and remote L1/L2 support.
 - Configured and repaired Chromebooks for TDSB; installed Windows updates, drivers, and security patches with post-change validation checks.
 - Trained and onboarded 10-15 employees on repeatable device-preparation, troubleshooting, documentation, and escalation workflows.

Security Concierge, SMS Securities - Toronto, ON
May 2024 - Present
 - Responded to incidents calmly, maintained accurate logs, followed escalation procedures, and trained 5-6 new recruits.

IT Support, Neon Valley Signs Ltd. - Etobicoke, ON
Oct 2016 - Nov 2018
 - Supported hardware, printers, network devices, software applications, PC connectivity, and general IT maintenance.
- ## EDUCATION
- McMaster University** **Expected 2028**
B.Tech in Software Engineering | Full-Time & Co-op Candidate
- ## CERTIFICATION
- Google IT Support Professional Certificate** **Issued Oct 2024**
